Summary

Frontend Developer with 2.6 years of experience specializing in React, TypeScript, and Next.js. Delivered complex products including fintech platforms and high-load tools, with full-stack capabilities across NestJS, Express, and Prisma

Education

Ukrainian State University of Chemical Technology Bachelor's Degree
Computer Engineering Ukraine, Dnipro • Sep 2019 – Jun 2023 (4 years)

Shifted focus to web development after an "Internet Technologies" course in 2020. Dedicated to building modern UIs and leveraging my computer engineering background for complex frontend solutions.

Experience

digwex Ukraine, Dnipro
Frontend Developer July 2023 – Dec 2025 (2 years 6 months)
Developed and maintained core frontend architecture while progressively taking ownership of complex full-stack features. Transitioned into a versatile role, implementing scalable backend logic and database schemas using Express.js and Prisma to deliver complete, production-ready solutions.

Projects

Byfalio
Joined the project at the early startup stage and developed the core frontend architecture. Responsible for the entire layout and complex business logic of the trading interface.

- Implemented responsive UI for seamless trading experience.
- Developed real-time data visualization and exchange components.
- Stack: **React, TypeScript, Tailwind CSS, Redux, Trading View**

ApeDEX
Contributed to the development of a decentralized exchange (DEX) on the **Solana** network, specifically designed as a **Telegram Mini App**.

- Integrated blockchain wallet connections and transaction handling within the Telegram interface.
- Optimized UI for high-speed data updates and low-latency user interactions.
- Stack: **Next.js, Solana Web3.js, Telegram Mini Apps SDK**.

Personal Projects

sift-shop — Full-Stack E-Commerce Platform
Built a production-ready monorepo e-commerce platform independently, implementing OAuth, 2FA, GraphQL API with NestJS/Prisma/PostgreSQL, Redis caching, AWS S3, and Next.js App Router storefront with deployment on Railway via Cloudflare.

Stack: **Next.js, NestJS, GraphQL, Prisma, PostgreSQL, Redis, AWS S3, TypeScript**
